

## ISO 14001

rev. 1 en (13-04-2025)

### ISO 14001 - Environmental Management Systems

At **Scent Emotions**, environmental responsibility is a core pillar of our business model. We understand that innovation must go hand-in-hand with sustainability, and our adherence to **ISO 14001** reflects our long-term commitment to reducing environmental impact across all areas of our activity.

#### Certification History

**Scent Emotions** obtained its first **ISO 14001 certification** in **July 1999**, becoming one of the early adopters of formal environmental management systems in the plastics and fragrance industries. This early commitment positioned us at the forefront of sustainability practices, and today we continue to operate in full alignment with the current standard: **ISO 14001:2015**.

#### Scope and Objectives

Our **ISO 14001** certification covers the **design, development, production and distribution** of:

- Fragrance-infused polymers
- Compounded materials and eco-designed composites
- Odor-neutralizing solutions and biocidal applications

Within this scope, our environmental objectives are to:

- **Minimize emissions**, waste generation, and energy consumption
- Promote **eco-efficiency** and **\*\*material optimization\*\***
- Integrate **life cycle thinking** into product design and innovation
- Comply with all applicable **environmental regulations and client requirements**

#### Key Environmental Practices at Scent Emotions

- **Photovoltaic energy** self-generation in production facilities
- **Advanced water reuse and efficiency** systems in manufacturing processes
- **Internal Advanced Recycling Plant** to reprocess in-house waste and materials
- Full commitment to the **Zero Pellet Loss** initiative under Operation Clean Sweep
- Traceability of recycled content through platforms like **MORE**
- Implementation of **ecodesign** principles under the **PEPE 2024-2028 plan**

## Benefits for Clients, Suppliers, and Stakeholders

- **Credibility:** Our ISO 14001 certification guarantees structured and audited environmental practices.
- **Partnership:** We collaborate with clients to develop eco-designed solutions tailored to sustainability goals.
- **Compliance:** We support suppliers and partners in aligning with increasingly demanding environmental regulations.
- **Reputation:** Our proactive stance on environmental management reinforces trust and brand value.
